Subject: Auto and Steel Manufacturers Extend ELVS Program through December 2021

Based on a mutual desire to maintain nationwide recovery of automotive mercury switches, auto and steel manufacturers have signed an agreement to continue the ELVS program past the current expiration of the National Vehicle Mercury Switch Recovery Program on December 31, 2017.

The ELVS program extension will be from January 1, 2018 through December 31, 2021. The services and program support currently provided by ELVS and the steel manufacturers will continue during the extension of the program.
